

## CONTENTS

### **Section 1 — Neurobiology, Neuroendocrinology, Reproduction**

Chairmen: E. KNOBIL (Houston, Texas)

W. RIETVELD (Leiden, Netherlands)

A. WIRZ-JUSTICE (Basel, Switzerland)

The effect of prolonged pulsatile and non-pulsatile GnRH stimulation on gonadotropin secretion in hypogonadotropic males 1

Z. DICKERMAN, R. PRAGER-LEWIN and Z. LARON

Rats free to select protein and energy separately show decreased circadian rhythm of brain serotonin 5

F. BLATTER, P. D. LEATHWOOD and D. V. ASHLEY

Effects of seasonal and circadian variations on neurotransmitters interactions 9

A. G. ROBERGE and C. BOISVERT

Circadian rhythms in behaviours mediated by 5-HT receptor stimulation in the rat 13

P. C. MOSER and P. H. REDFERN

Clorgyline increases the circadian period, the activity-rest ratio and total activity in the Syrian hamster 17

W. C. DUNCAN, L. TAMARKIN and T. A. WEHR

Peripheral mechanisms are involved in the appearance of disturbed circadian rhythmicity and tolerance after chronic methamphetamine 21

K. KRAEUCHI, A. WIRZ-JUSTICE and H. FEER

Gene-dependent effect of lithium on circadian rhythms in mice 25

B. POSSIDENTE and R. EXNER

The effect of long term application of clorgyline on the circadian rhythm of food intake in the rat	29
W. J. RIETVELD, W. HEKKENS and G. A. GROOS	
Neuropharmacological tools in the study of circadian rhythmicity in animal behaviour	33
W. J. RIETVELD and A. WIRZ-JUSTICE	
Circadian control of the rapid development of tolerance to CNS drugs in the rat	37
K. F. A. SOLIMAN, R. L. WILLIAMS and C. A. WALKER	
Effects of chronobiotic drugs on the cholinergic enzyme system of various rat brain regions	39
M. R. I. SOLIMAN and C. A. WALKER	
Factors controlling melatonin rhythmicity in the pineal gland of the Syrian hamster	41
R. REITER, S. OAKNIN, M. TROIANI and K. LI	
Abnormal melatonin rhythms in lighting regimens with low light intensity	45
R. W. RIVEST	
Alleviation of 'jet lag' by melatonin: preliminary results of a controlled double-blind trial	49
J. ARENDT, M. ALDHOUS and V. MARKS	
Circadian rhythms of melatonin and other indole derivatives in hamster pineal gland	53
R. RIPS, B. GIBELIN and E. MORIER-TEISSIER	

### **Round Table — Peptide Analogues: Chronobiologic Guidelines**

Chairman: F. CARANDENTE (Milan, Italy)

Peptide analogues in medicine: chronobiological guidelines	55
F. CARANDENTE	
Chronization by the ACTH 1-17 analogue: a clinical perspective	59
A. ANGELI	
Immunochronobiology of synthetic peptides	63
F. DAMMACCO	
Technical-organizing aspects of LHRH analog (Buserelin) endometriosis study	67
P. MARRAMA	

Analogues of peptide hormones: biochemistry and pharmacology	71
L. MARTINI	

## Section 2A — Toxicology, Allergology and Immunology

Chairmen: J. CAMBAR (Bordeaux, France)	
G. FERNANDES (San Antonio, Texas)	
Y. TOUITOU (Paris, France)	

Circadian changes of human natural killer (NK) cells and their <i>in vitro</i> susceptibility to cortisol inhibition	75
G. GATTI, R. CAVALLO, D. DEL PONTE, M. SARTORI, R. MASERA, R. CARIGNOLA, F. CARENDEnte and A. ANGELI	
Modulation of immunological function in mice treated with cytoxan on a circadian basis	79
G. FERNANDES, L. SANDBERG and M. DAUPHINEE	
Circannual variation of the histamine-induced wheals in the rat	81
R. PIERRE, E. MALHERBE, P. MANCHON and C. SOULARD	
Circannual variation of the passive cutaneous anaphylaxis test	85
R. PIERRE, E. MALHERBE, P. MANCHON and C. SOULARD	
Circadian changes of plasma histamine levels in healthy subjects under controlled tritoqualine (TRQ) treatment	89
H. J. REIMANN, M. OHE, T. W. P. LEDERER, K. S. ZANKER and D. REHN	
Spirometry and arterial blood-gases in patients with nocturnal asthma: effects of slow-release terbutaline	93
L. ERIKSSON, B. JONSON, G. EKLUNDH and G. PERSSON	
Chronotoxicity and methylmercury chloride in BALB/c mice	95
H. TAMASHIRO, M. ARAKAKI, H. AKAGI, K. MURAO, K. HIRAYAMA, M. H. SMOLENSKY and B. HSI	
Chronobiological approach of protective effect of mercurius corrosivus against mercury-induced nephrotoxicity	99
J. C. CAL, F. LARUE, J. GUILLEMAIN and J. CAMBAR	
Chronohepatotoxicity of styrene in rat	103
M. DESGAGNE and P. M. BELANGER	
Circadian variations in the nephrotoxicity induced by high doses of gentamicin and dibekacin in rats	107
C. PARIAT, J. CAMBER, A. PIRIOU and Ph. COURTOIS	

Circadian and seasonal variations in amikacin-induced acute renal failure evaluated by gamma glutamyl transferase excretion changes	111
C. DORIAN, C. BORDENAVE and J. CAMBAR	
Circadian endocrine rhythm alterations in elderly cigarette smokers	115
E. HAUS, G. Y. NICOLAU, D. LAKATUA, L. SACKETT-LUNDEEN, C. BOGDAN and E. PETRESCU	
Drugs of abuse: rhythms of emergency room admissions	119
R. W. MORRIS	
Diurnal variation in human response to influenza vaccination: a pilot study of 125 volunteers	123
P. H. LANGLOIS, R. F. WHITE and W. P. GLEZEN	

## **Section 2B — More about Theophylline**

Chairman: M. SMOLENSKY (Houston, Texas)

Comparison of diurnal variation of three sustained release theophylline preparations in asthmatic children	125
K. COULTHARD, D. BIRKETT, D. LINES and N. GRGURINOVICH	
Clinical relevance of day/night patterns of theophylline concentrations in asthmatic children	129
P. SCOTT, M. SMOLENSKY, W. KRAMER and R. HARRIST	
Sustained-release theophylline at 12-hour intervals does not alter staging of circadian rhythms	131
M. SMOLENSKY, D. ALBRIGHT, B. HSI, P. SCOTT and J. McGOVERN	
Chronotherapeutic dose regimens for theophylline preparations — clinical pharmacological rationale and pharmacokinetic assessment	135
V. W. STEINIJANS and W. BEIER	
Circadian difference in theophylline effect during constant rate infusion with aminophylline	139
M. SMOLENSKY, P. SCOTT, D. ALBRIGHT and J. McGOVERN	
Effect of theophylline in nocturnal bronchial asthma	143
P. DOROW and V. W. STEINIJANS	

- The advantage of once-daily evening versus morning sustained release theophylline dosing for nocturnal asthma 147  
 A. REINBERG, F. PAUCHET, F. RUFF, A. GERVAIS, M. SMOLENSKY, F. LEVI, P. GERVAIS, D. CHAOUAT, R. ZIDANI and M. ABELLA

- Effect of time of once-daily dosing on serum theophylline concentrations at steady-state 151  
 W. KRAMER, P. SCOTT, M. SMOLENSKY, R. HARRIST, P. HIATT, J. BAENZIGER, B. KLANK and H. EIGEN

- Comparison of the effect of sustained release theophyllines (SRT) in asthmatic children 153  
 R. HARRIST, M. SMOLENSKY, P. SCOTT and W. KRAMER

### Round Table — Clinical Chronopharmacology of Theophylline

Chairman: M. SMOLENSKY (Houston, Texas)

- Twice daily vs. once nightly theophylline administration for nocturnal asthma 157

J. H. WILKENS, H. WILKENS, M. OELLERICH and G. SYBRECHT

- The role of food intake on day-night differences in theophylline absorption 161

J. H. G. JONKMAN

### Section 3 — Anticancerous Medications and Cancer

Chairmen: C. FOCAN (Liege, Belgium)

F. LEVI (Paris, France)

L. SCHEVING (Little Rock, Arkansas)

- Chronopharmacological analysis of an autonomously oscillatory circadian clock in the algal flagellate *Euglena* 165

L. N. EDMUNDS, JR. and D. L. LAVAL-MARTIN

- A comparison of circadian-stage dependent effects of epidermal growth factor on the incorporation of (H3)-thymidine into deoxyribonucleic acid in esophagus, pancreas and kidney of *ad libitum* fed fasted CD2F mice 169

L. A. SCHEVING, T. TSAI, S. HOKE and L. E. SCHEVING

- Effect of insulin on incorporation of (3H)TdR into deoxyribonucleic acid in the spleen, thymus, bone marrow and lung of fasted and *ad libitum* fed mice 171

L. E. SCHEVING, T. TSAI and L. A. SCHEVING

Synchronous waves of proliferation in human ovarian cancers	175
R. R. KLEVECZ and P. S. BRALY	
Circadian rhythms in multiple variables of haemopoiesis in mice: factors of possible importance for lowering the susceptibility to toxic drugs	179
O. LAERUM, O. SLETVOLD and T. RIISE	
Timing of amphotericin B therapy is a critical determinant of toxicity	183
K. M. SKUBITZ, M. WICK, A. SKUBITZ, T. LANGEVIN, R. OLSHEFSKI, R. VON ROEMELING, R. SOTHERN and W. HRUSHESKY	
Circadian dependency of vinblastine toxicity	187
M. C. MORMONT, J. BERESTKA, T. MUSHIYA, T. R. LANGEVIN, R. VON ROEMELING, J. RABATIN, R. SOTHERN and W. HRUSHESKY	
Circadian stage dependency of FUDR toxicity	191
R. VON ROEMELING, M. WICK, J. RABATIN, J. BERESTKA, T. LANGEVIN, D. LAKATUA, C. MORMONT, T. MUSHIYA and W. HRUSHESKY	
Circadian time dependence of murine bone marrow tolerance for the anticancer agent 4'-O-tetrahydropyranyl adriamycin (THP)	195
A. FERLE-VIDOVIC, I. BLAZSEK and F. LEVI	
Clinical chronopharmacologic optimization of hematologic tolerance for the anticancer agent 4'-O-tetrahydropyranyl adriamycin (THP). Preliminary results	199
F. LEVI, F. BAILLEUL, J. MISSET, C. CHEVELLE, F. LESAUNIER, J. VANNETZEL, R. DESPAX, D. MACHOVER, P. RIBAUD and G. MATHE	
Circadian drug schedule affects drug toxicity, ovarian cancer response and patient survival	203
W. HRUSHESKY	
Alteration of physiologic circadian time structure of six plasma proteins in patients with advanced cancer	207
B. BRUGUEROLLE, F. LEVI, C. ARNAUD, G. BOUVENOT, M. MECHKOURI, J. VANNETZEL and Y. TOUITOU	
Kinetically-scheduled sequential chemotherapy with cyclophosphamide (CPA) and vinblastine (VLB) in a methylcholantrene (MCA)-induced sarcoma of	

- mice. Importance of circadian rhythm of  
division 211  
C. FOCAN, J. SCHYNS-MOSEN, H. BARBASON and  
E. BETZ

### **Round Table — Pumps for Timing Medications**

Chairman: W. HRUSHESKY (Minneapolis, Minnesota)

- Preliminary investigations into the circadian variations of  
doxorubicin (adrianmycin) plasma concentrations and  
systemic clearance when administered as a prolonger IV  
infusion 215  
J. A. SINKULE, K. Y. CHOI, D. ROEMELING, D. HAN and  
T. LANGEVIN

- The influence on survival of season of onset of childhood  
acute lymphoblastic leukemia (ALL) 217  
P. COHEN

- Circadian pharmacodynamics of cyclosporine in rats and  
man 219

L. D. BOWERS, J. T. RABATIN, M. WICK, D. CANAFAX,  
W. HRUSHESKY and E. BENSON

- Single cosinor analysis of vaginal smear cell types quantifies  
mouse estrous cycle and its alteration by mammary  
adenocarcinoma 223  
H. V. RATAJCZAK, R. SOTHERN and W. HRUSHESKY

### **Round Table — Automatic Programmable Drug Delivery Systems: Tools for our Time**

Chairman: W. HRUSHESKY (Minneapolis, Minnesota)

- Computerized ambulatory drug delivery (CADD) systems 227  
C. ADAMS

- Chronobiology by auto syringe: the history of the  
development of a wearable syringe infusion pump with the  
ability to reproduce a natural sinusoidal delivery 229  
S. W. SAGON

- A flow and time programmable multichannel parenteral  
drug delivery system: description and application  
considerations 233  
D. C. HOWSON

Adriamycin chronotherapy of advanced breast cancer with a programmable, implantable drug administration device (DAD). Preliminary results	237
F. LEVI, F. BAILLEUL, G. METZGER, J. L. MISSET, J. M. VANNETZEL, C. REGENSBERG, A. REINBERG and G. MATHE	
Automatic chronotherapy using an implanted programmable pump	241
R. VON ROEMELING, T. LANGEVIN, J. RABATIN, H. BUCHWALD, B. KENNEDY and W. HRUSHESKY	
<b>Section 4 — Investigative Methods in</b>	
<b>Chronopharmacology (Including Statistics)</b>	
Chairmen: J. DE PRINS (Tervuren, Belgium) E. HAUS (Minneapolis, Minnesota) G. LABRECQUE (Quebec, Canada)	
Circadian influence on food intake in rats on restricted feeding schedules	245
G. ALINDER, N. RUBIN, W. RIETVELD and J. THOMPSON	
Preliminary results on the masking effects of food, light and activity on human rhythms	249
P. SCHULZ, M. REY, R. RIVEST and P. DICK	
The 'drug' bright light: open questions on methodology	253
M. DIETZEL, F. WALDHAUSER, B. SALETU and O.-M. LESCH	
Effect of timed single low-dose ethanol ingestions on the circadian rhythm of body temperature of rats monitored by the Data Sciences DataQuest III-Cardiotel system	257
D. H. LI, R. NOVAK, B. HSI and B. BROCKWAY	
Blood pressure variability: instruments and methods for its ambulatory non-invasive assessment	261
M. HALLEK, E. HAEN, F. HALBERG and A. PANGERL	
Amalgamation of chronobiological methods with computer based clinical data systems	265
K. GORDON and M. S. KNAPP	
Multivariate analysis of the circadian rhythm parameters of pulmonary responses to theophylline	267
B. P. HSI, P. SCOTT, D. ALBRIGHT and J. McGOVERN	
Angular regression for biological rhythms	271
T. DOWNS	

Seasonal variation in oral contraceptive failure: an analysis of survey data E. S. LEE and M. RAWDIN	273
Bootstrapping strengthens relations of plasma dehydroepiandrosterone-sulfate to personality — illustrative rationale for prophylactic chronotherapy R. C. HERMIDA, F. HALBERG and S. SANCHEZ DE LA PENA	277
The study of hormonal ultradian pulsatility in human being: the need for specific algorithms J. C. THALABARD, G. THOMAS, O. JOLIVET and M. METTIVIER	281
Chronoavailability: a concept to determine optimal time for drug administration B. HECQUET	285
The time-dependent response to an auditory vigilance task as a random variable J.-L. GUISSET and J. DOUCHAMPS	289
Gentamicin-induced chronotoxicity: use of body temperature as a circadian marker rhythm G. SOULBAN and A. YONOVITZ	293
Comparison of cortisol circadian rhythms documented in samples of saliva, capillary (finger tips) and venous blood from healthy subjects Y. TOUITOU, Y. MOTOHASHI, A. PATI, F. LEVI, A. REINBERG and O. FERMENT	297
Circadian stage dependence of sodium pentobarbital induced alterations in the ophidian hemogram A. PATI	301
Alterations in the motor activity circadian rhythm induced by stress. Effect of light pattern A. DIEZ-NOGUERA, M. RIBOT and T. CAMBRAS	305

## Section 5 — Cardiovascular and Antiinflammatory Agents

Chairmen: P. M. BELANGER (Quebec, Canada)  
O. LAERUM (Bergen, Norway)

Chronopharmacological study of the effect of corticosterone on BCG-induced granulocyte migration in normal and in adrenalectomized mice J. P. BUREAU, M. COUPE and G. LABRECQUE	309
--	-----

Diurnal variation in the pharmacokinetics of acetylsalicylic acid (aspirin) in the rat	313
P. M. BELANGER, M. LALANDE, F. DORE and G. LABRECQUE	
Clinical chronokinetic changes in a sustained release preparation of ketoprofen (SRK)	317
A. REINBERG, F. LEVI, Y. TOUITOU, A. LE LIBOUX, J. SIMON, A. FRYDMAN, A. BICAKOVA-ROCHER and B. BRUGUEROLLE	
Chronokinetics of ketoprofen infused intravenously at a constant rate	321
H. DECOUSUS, M. OLLAGNIER, Y. CHERRAH, B. PERPOINT, J. HOCQUART and P. QUENEAU	
The chronobiology of human mortality	323
M. M. MITLER, R. HAJDUKOVIC, R. SHAFOR and D. KRIPKE	
Circadian variation in the frequency of occurrence of acute cardiovascular disease	327
S. N. WILlich, C. A. CZEISLER, G. H. TOFLER, P. LUDMER, G. AYLMEr, J. RUTHERFORD, P. STONE and J. MULLER	
The number of $\beta$ -adrenoceptor sites on intact human lymphocytes depends on time of day, on season and on sex	331
A. PANGERL, J. REMIEN and E. HAEN	
Circadian-phase-dependency in pharmacokinetics and cardiovascular effects of oral propranolol in man	335
B. LANGNER and B. LEMMER	
On the chronopharmacology of oral isosorbide dinitrate: pharmacokinetics and cardiovascular effects in healthy subjects	339
B. LEMMER, H. BECKER, J. RENCZES, B. SCHEIDEL and H. BLUME	
Effects of imipramine on circadian rhythms in the beta-receptor-effector system and in the motor activity of rats	343
B. LEMMER, Z. GORKA, H. GOTTHEINER and P. H. LANG	
Time dependency and effect of propranolol on hepatic clearances of Tc-HIDA and antipyrine in healthy man and in liver diseases	347
A. MARKIEWICZ, M. HARTLEB, K. RUDZKI, St. NOWAK and H. BOLDYS	
Circadian amplitude-hypertension signals incomplete therapeutic mesor reduction and need for timing beta-blockers	351
F. HALBERG, V. McCALL, W. McCALL and R. SOTHERN	

- The respiratory sinus arrhythmia: an ultradian rhythm  
 pregnant with medically relevant information 353  
 W. HRUSHESKY, T. LANGEVIN, D. FADER and  
 C. HERZOG

## Section 6 — General Chronopharmacology, Nutrition, Gastroenterology

Chairmen: P. LEATHWOOD (Vevey, Switzerland)  
 F. STURTEVANT (Chicago, Illinois)  
 K. VENER (Bethesda, Maryland)

- Circadian variation in the cytochrome P-450 system of rat  
 liver 357  
 E. HAEN and I. GOLLY
- Temporal variation in the inductive effect of 3,4-benzpyrene  
 in rat 361  
 P. M. BELANGER, B. BRUGUEROLLE and M. DESGAGNE
- Chronopharmacokinetics of serum gentamicin in Sprague-  
 Dawley male rats 365  
 D. LAKATUA, M. THOMPSON, E. HAUS and L. SACKETT-  
 LUNDEEN
- Chronobiological properties of the digestive system  
 affecting xenobiotic absorption 369  
 K. VENER
- Circannual rhythms of basal and stimulated gastric  
 secretion in conscious cats 373  
 D. PANSU, M. MECHKOURI and M. VAGNE
- Circadian rhythms in neurotensin concentration in rat small  
 intestine 377  
 N. H. RUBIN, G. ALINDER, W. RIETVELD, G. GREELEY, JR.  
 and J. THOMPSON
- Chronopharmacology of activity-stress ulcer in rat 381  
 N. OGAWA, H. YOSHIMURA and N. KAN
- The chronopharmacology of drug-induced gastric and  
 duodenal ulcers 383  
 S. SZABO, D. PFEIFFER and T. OISHI
- Circadian variation of insulin mediator peptide and  
 correlation to the circadian rhythm of hepatic pyruvate  
 kinase catalytic activity 385  
 R. J. FEUERS, D. CASCIANO, T. TSAI and L. E. SCHEVING

Ultradian, circadian and circannual rhythms of blood glucose and injected insulins documented in six self-controlled diabetics	389
M. A. KOLLOP, A. BICAKOVA-ROCHER, A. REINBERG, P. DROUIN, L. MEJEAN and G. DEBRY	
Nocturnal variations in plasma insulin clearance rate	391
S. DUX, N. WHITE and J. SANTIAGO	
Time-dependent effect of magnesium on blood glucose in man	395
O. FERMENT and Y. TOUITOU	
Hormonal circadian profiles in obesity	399
E. FERRARI, P. BOSSOLO, G. MARELLI, S. FOPPA, P. MAGNI, F. BRAMBILLA and F. FRASCHINI	
Is there a circadian rhythm of gastric acid secretion and mucosal resistance in man?	403
J. G. MOORE and F. HALBERG	

## **Section 7 — Clinical Chronopharmacology and Chronotherapeutics**

Chairmen: A. ANGELI (Torino, Italy)  
S. NAKANO (Ehime, Japan)  
A. REINBERG (Paris, France)

Circadian profiles of plasma cortisol and 17-hydroxyprogesterone in late-onset 21-hydroxylase deficiency: evidence for rapid changes of the enzyme activity	405
A. ANGELI, G. GATTI, R. CARIGNOLA, A. SALVADORI, G. PINNA, P. CACCAMO and G. BELLOTTI	
Thyrotropin and prolactic responses to TRH at different nycthemeral times in normal men	409
D. JORDAN, M. CURE, B. CLAUSTRAT, R. COHEN, F. BORSON and J. ORGIAZZI	
Circadian-stage dependent variations of insulin and C-peptide response to oral glucose tolerance test in 3 young subjects with diabetic family history and islet-cell antibodies positive	413
P. MARRINO, G. RAVAGLIA, P. LANDI, C. STAMPI, M. CAPELLI, D. FORNARO, F. AGRIMONTI and A. LODI	
Circadian rhythms in human carcinoembryonic antigen (CEA), alphafetoprotein (AFP) and prostatic acid phosphatase (PAP): evidence of chronopathology in cancer	417
C. FOCAN, J. COLLETTE, F. LEVI, W. HRUSHESKY, Y. TOUITOU and P. FRANCHIMONT	

Circadian stage-dependent changes in diazepam and valproate kinetics in man: a single and repetitive administration study	421
S. NAKANO, H. WATANABE, S. OHDO and N. OGAWA	
Chronokinetics of indomethacin in elderly subjects	425
B. BRUGUEROLLE, G. BARBEAU, P. BELANGER and G. LABRECQUE	
Circadian profiles and circaseptan periodicity in the frequency of administration of analgetic drugs after oral surgery	429
L. POLLMANN and G. HILDEBRANDT	
Once-a-day dosing (morning versus evening) of ethyl loflazepate in anxiety disorders. Changes in the circadian rhythm of self-rated symptoms	433
A. BICAKOVA-ROCHER, Ch. FROHWIRTH, A. GORCEIX and A. REINBERG	
The influence of the new antidepressant rolipram on alertness, performance and mood in healthy volunteers varied with time of day and diurnal type of subject	437
K. STEPHAN and R. DOROW	
A multicentric chronotherapeutic study of mequitazine in allergic rhinitis	441
A. REINBERG, P. GERVAIS, C. UGOLINI, L. DEL CERRO, A. BICAKOVA-ROCHER and A. NICOLAI	
Lack of effect of magnesium pyrrolidone carboxylate injection on parathormone release at different circadian stages	445
O. FERMENT, P. GARNIER and Y. TOUITOU	
Chronotherapeutic approach to the management of periodic headaches	449
G. MICIELI, G. C. MANZONI, A. CAVALLINI, E. MARTIGNONI, G. SANDRINI, G. SANCES and G. NAPPI	
Cyclic reduction of plasma $\beta$ -endorphin in premenstrual syndrome (PMS)	453
F. FACCHINETTI, E. MARTIGNONI, M. MONACO, G. BONO, V. SANTORO, G. SANCES, G. NAPPI and A. GENAZZANI	
Chronopharmacology of haloperidol in schizophrenic patients	455
R. S. NATHAN, J. PEREL, R. STILLER, T. McCARTHY and S. CURRAN	

Clinical application of the luteinizing hormone-releasing hormone analogue, buserelin, for endometriosis therapy L. DE CECCO, V. REMORGIDA and P. L. VENTURINI	459
Author Index	463
Subject Index	467
